

ADPRO® Tech Tip

Alarm Handling During Remote Setup

Overview

This Tech Tip is provided to Installers, Central Monitoring Station (CMS) operators and End Users to describe the handling of alarms during remote setup of ADPRO FastVu and ADPRO Fast Scan.

Vision Systems

Alarm Handling During Remote Setup

Description When entering remote setup of ADPRO FastVu and ADPRO Fast Scan, all stored pending and new alarms are not reported, and are cleared when setup is completed.

This is normal/expected behaviour. Both FastVu and Fast Scan have a separate setup mode of operation, during which, all new alarms are ignored and all existing alarms are cleared on exit.

If using ADPRO Video Central software to remotely set up a FastVu or Fast Scan, alarms generated during the setup process are not shown in the history, and the site is not shown in the site list.

The FastVu log will show the Events occurring but the Video Central Database will not contain any event entries.

Additional Support

Additional Support For further information and support please contact your nearest Vision Fire & Security office, or e-mail ADPRO Technical Support at: adpro-support@adpro.com.au
